	<p data-bbox="577 284 1801 657">Subspecialty-Specific Background and Intent: The requirement for ABIM- and/or AOBIM-certified core faculty members ensures subspecialty-specific educators with appropriate qualifications for managing and providing comprehensive patient care to complex, critically ill patients. Therefore, the Review Committee expects that the majority of the core faculty will be ABIM- or AOBIM- certified. However, critical care medicine physicians with certification from the American Board of Emergency Medicine can also be identified as core subspecialty faculty members as long as they have completed a 24-month critical care medicine fellowship in an ACGME-accredited internal medicine critical care medicine program. In addition, although anesthesia and surgical critical care medicine physicians can also participate in the program, they cannot be counted towards the minimum required number of subspecialty-certified core faculty members.</p> <p data-bbox="577 695 1904 792">II.B.4.c) The required core faculty members must be provided with support equal to an aggregate minimum of 15 percent/FTE for educational and administrative responsibilities that do not involve direct patient care.
